

Configuring the iOS ClickView App for Xavier College

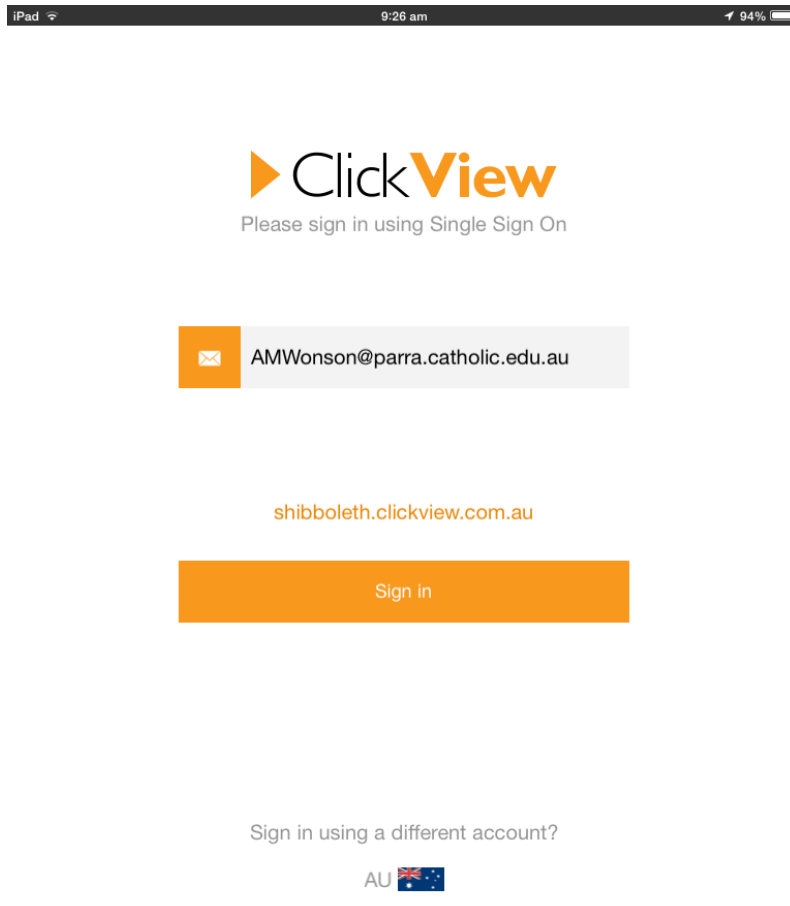

ClickView can be viewed on iOS devices such as iPhones and iPads and on Android devices as well. To download for your Android device, download the ClickView app from the Google Play Store. To download the iOS device, go to the App Store on your iOS device and install it. When you visit the App Store, you need to download the app called ClickView, not ClickView Live. Once you have installed ClickView to your iOS device, carry out the following steps.

- From your home screen, tap on Settings.
- On the left hand side of the screen, scroll down until you find ClickView and tap on ClickView. This is shown below.

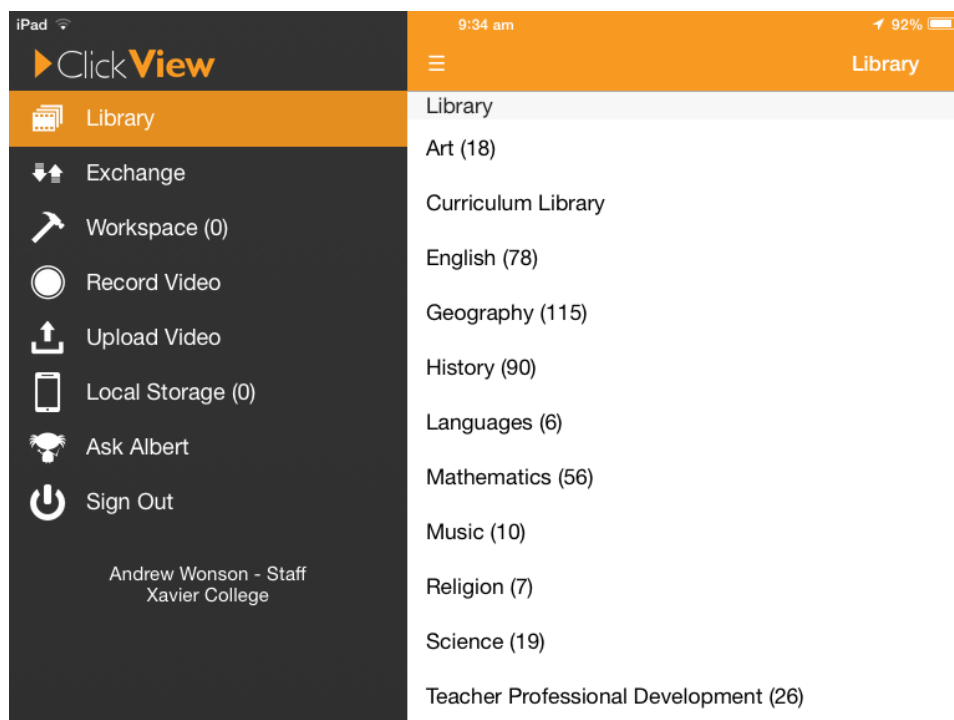

- Under the section called “Account Details” on the right, enter your school email address. DO NOT enter your password. Students would enter their school email address.
- Make sure the location is set to “Australia”.
- Below, find the section called Single Sign On (SSO) and enable it.
- In the address for SSO, enter the following address (note: there is only one capital letter below): <https://shibboleth.clickview.com.au/Shibboleth.sso/xaviercollege>
- Return to your Home Screen. The ClickView app should now be ready for use by tapping on it once.

- When you run the app, you should see the following screen on your iOS device. Tap the Sign In button to start ClickView. **When the app starts, DO NOT tap the cancel option as it is communicating with CENet.**

- After you tap Sign in, you will be required to authenticate through CENet by using your CEO username and password. After authenticating, **DO NOT tap the Cancel button.** ClickView will open on your iOS device and you should see the following screen:

- Tap Sign Out if you are using a shared device.
